(54) Title: TOURNIQUET

(57) Abstract: The invention is directed to a self-regulating tourniquet including a pressure source, a pressure applicator apparatus associated with said pressure source and operative to apply pressure therefrom to a subject limb, and a pressure regulator associated with said pressure source and said pressure member, operative to restrict the pressure transferred from said pressure source to the limb to a designated maximum pressure applied to the subject limb. The pressure source and the pressure applicator apparatus may be separate modules that are adapted to be engaged by connecting means and establish gas passage from the pressure source to said pressure applicator.
